

Corrosion Management & Protection Services

The Challenge

Corrosion is a significant safety, environmental and business risk to the integrity of offshore, onshore and marine assets. Regulators are putting increasing pressure on Operators to have compliant and holistic corrosion management and protection systems.

The Solution

EM&I are different — our complete Corrosion Management & Protection package ensures you have one organisation committed and accountable to you capable of delivering a cost effective and compliant corrosion management and protection service, comprising:

Corrosion Management

- Corrosion Management Strategies and RBI plans
- Database set-up and management
- Coating and CP surveys
- ICCP and Cathodic Protection system design
- Management & Site Supervision

Corrosion Protection

- Combined Coating, Fabric Maintenance and Access package
- Fixed and Floating Assets
- ICCP and CP system installation and management

The Benefits

Our comprehensive and innovative solution brings proven quality and cost benefits to your business.

EM&I's in depth experience and in-house Corrosion Engineering expertise delivers practical, best-in-class corrosion management systems and RBI plans and our expert team of Technical Administrators can set-up and manage your databases at competitive cost.

Our skilled Surveyors prepare condition reports and prioritised Coating Maintenance Plans and budgets and can manage, supervise or execute the Coating Maintenance campaigns.

EM&I are leaders in innovative Cathodic Protection solutions, both sacrificial and impressed current.

Our patented ICCP design for Floating Production has lower life cycle costs than alternatives is particularly suited to extended life assets and can be retrofitted with minimal or no subsea intervention, thus reducing costs and enhancing safety.

EM&I's multiskilled corrosion protection execution capability and specialist tools maximise site work efficiency, reduce bedspace requirements and provide a fully rounded and unique Corrosion Protection Service.

Track Record

We measure our performance through systems like FPAL and unsolicited testimonials. Our proven track record of satisfied Clients is available on our Website.

Further information is available from your nearest EM&I office who will be pleased to discuss your particular needs.

Case Histories and References, demonstrating our capabilities and Client satisfaction, are available on our Website.

Credentials

Health & Safety – EM&I has an outstanding HSE record and has been granted the RoSPA President's Award in recognition of winning eleven consecutive RoSPA Occupational Health & Safety Gold Awards including five Gold Medals and numerous other international awards.

Other safety awards include IFAP Safe Way Safety Achievement Awards and the Leith Offshore Safety Award.

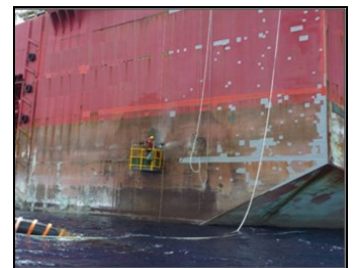

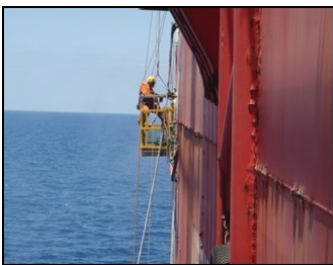

Quality – We assure quality through accredited ISO 9001 and ISO 17020 management systems and seek continuous improvement by measuring Client satisfaction through FPAL and regular Stewardship Reviews.

Compliance – EM&I's methods are approved by Classification Societies and accepted by regulators worldwide.

Rope Access – EM&I have been a Full Member of IRATA since its inception in the 1980s.

HITS JIP – EM&I have a leadership role in the Hull Inspection Techniques and Strategy (HITS) JIP whose members include Oil Majors, Classification Societies, Regulators, Lease Operators and service companies.
