

Digital Radiography Services

The Challenge

How can owners/operators ensure the integrity of piping where conventional ultrasonic gauging results are not detailed enough or where the piping is insulated?

The Solution

EM&I Digital Radiography services provide the ability to assess piping condition through insulation and other enclosing media such as ice. The resulting images are stored in an electronic database and can be used for monitoring piping condition by referring to a dated register of radiography shots.

EM&I's Digital Radiography service can reduce maintenance effort and facilitates corporate and regulatory compliance, and can be used with the use of rope access eliminating the need for scaffolding.

The Benefits

- Provision of high quality radiographs
- Maximising site work efficiency
- Reduces health & safety risks
- Capable of producing radiographs through insulation, ice, cladding etc
- Saves cost - No need for shutdown or stripping of insulation
- Lightweight, compact scanner suitable for use on site or in remote locations
- On site darkroom and processing chemicals not required
- Real time transmission of radiographs minutes after the shot has been taken
- Flexible, powerful, accurate measuring software which can determine wall thickness
- Flash Filter significantly improves the image quality
- Digital Radiography can be used for the detection of water-saturated insulation, detecting the areas early will reduce future costs of CUI failure and ensure the integrity of the plant

Track Record

We measure our performance through systems like FPAL and unsolicited testimonials. Our proven track record of satisfied Clients is available on our Website.

Further information is available from your nearest EM&I office who will be pleased to discuss your particular needs. Case Histories and References, demonstrating our capabilities and Client satisfaction, are available on our Website.

Credentials

Health & Safety – EM&I has an outstanding HSE record and has been granted the RoSPA President's Award in recognition of winning eleven consecutive RoSPA Occupational Health & Safety Gold Awards including five Gold Medals and numerous other international awards.

Other safety awards include IFAP Safe Way Safety Achievement Awards and the Leith Offshore Safety Award.

Quality – We assure quality through accredited ISO 9001 and ISO 17020 management systems and seek continuous improvement by measuring Client satisfaction through FPAL and regular Stewardship Reviews.

Compliance – EM&I's methods are approved by Classification Societies and accepted by regulators worldwide.

Rope Access – EM&I have been a Full Member of IRATA since its inception in the 1980s.

HITS JIP – EM&I have a leadership role in the Hull Inspection Techniques and Strategy (HITS) JIP whose members include Oil Majors, Classification Societies, Regulators, Lease Operators and service companies.
